Last week we created a web server, and this week we wanted to create a database before creating registration and auto-identification. And when creating the database, we got an error

```
go get -u gorm.io/gorm v1.24.5
PS C:\00.web\go-workspace\NDY-corp\1.src\midterm-1\src-code> go build
-v ./cmd/apiserver
PS C:\00.web\go-workspace\NDY-corp\1.src\midterm-1\src-code> ./apiserv
er
2023/02/26 20:37:42 pq: "ACER"
PS C:\00.web\go-workspace\NDY-corp\1.src\midterm-1\src-code> createdb
restapi_dev
ORACLE_HOME must be set and %ORACLE_HOME%\database must be writeable
"C:\oraclexe\app\oracle\product\11.2.0\server\bin\CreateDB.bat" termin
ated unsuccessfully.
PS C:\00.web\go-workspace\NDY-corp\1.src\midterm-1\src-code> 
```

After asking you in chat we will use "go get -u gorm.io/gorm".

```
package model

// User ...
type User struct {
    ID          int
    Email       string
    EncryptedPassword string
}
```

```
package store

import (
    "database/sql"
    _ "github.com/lib/pq" // ...
)

// Store ...
type Store struct {
    config      *Config
    db          *sql.DB
    userRepository *UserRepository
}
```

```
